What We Do

Cizer's senior leadership works with you to define the most appropriate way your organization can leverage a multitude of available services to positively impact your Business Intelligence investments in technologies such as Microsoft SQL Server, Microsoft Office SharePoint Server and Microsoft Office Performance Point Server.

Our goal is to give you value through our own experiences with numerous engagements, through execution of proven methodology and through leading edge experience and multiple implementations of the entire set of Microsoft Business Intelligence technologies.

Examples of the way Cizer Solutions engages with customers to deliver valuable Business Intelligence solutions can be seen below.

Delivering Innovative Solutions on the Microsoft Business Intelligence Platform

The Value of Cizer

Cizer, a Microsoft Gold Certified Partner, is a different company than most organizations offering Business Intelligence consulting, since Cizer delivers commercial software products such as Cizer.Net Reporting to our customers along with their solutions.

It is through these product development experiences that Cizer has been enhanced as a consulting organization, understanding all the significant elements of the ENTIRE Microsoft Business Intelligence platform.

Beyond this product experience, our dedicated training and customer mentoring programs, Cizer has literally written the book on many facets of Microsoft Business Intelligence.

SERVICES AT A GLANCE

Managed Engagement
Customers engage all facets of Cizer, inclusive of project management, to deliver innovative Business Intelligence Solutions.

Semi-Managed Engagement
Customers engage Cizer's expertise to supplement their own project team. Cizer provides a high-level of engagement oversight to ensure high standards.

Technical Mentoring
Cizer delivers solid expertise to jump-start a customer's project and ensure people are on the correct path. This service augments customers who have joined Cizer's 'B.I. in a Box Program.'

On-Site Training
A Cizer Business Intelligence veteran instructor will come to your offices to deliver training on one of the many Microsoft and Cizer Business Intelligence Technologies.

Team Augmentation
Customers who have a sound understanding of their business problem and have a proven pattern for managing their own solutions choose this service to bolster the technical capabilities of their team.

Types of Solutions

Cizer Solutions teams have capably delivered the following solutions for Public Sector, Mid-Market and Fortune 1000 customers.

Defining the Course – Through practical application of low to no-cost assessment solutions, we can give you a clear picture of the path ahead for Business Intelligence in your organization.

Delivering the BI Platform - Data Mart and Data Warehouse Design and Development using Microsoft SQL Server provide a solid foundation for B.I.

Unifying Information for Decision Making - Innovative ETL and Data Migration Processes using SQL Server Integration Services from diverse data sources including Oracle, DB2, Informix and many others, including MOSS and the new Office 2007 Excel Services analytics.

Raising the Bar on Information Visualization and Availability - Reporting Solutions leveraging the advanced capabilities of Cizer.Net Reporting paired with the SQL Server Reporting Services platform to turn on Self-Service Reporting on virtually any source of information within the organization. Bringing information assets to front-line decision makers and empowering IT to provide a platform for everyone is something we do EVERYDAY.

Answering Hunches and Exploring Trends - Analytic Solutions supporting significant business calculations and data mining investigations on SQL Server Analysis Services, ProClarity and the Microsoft Office platform.
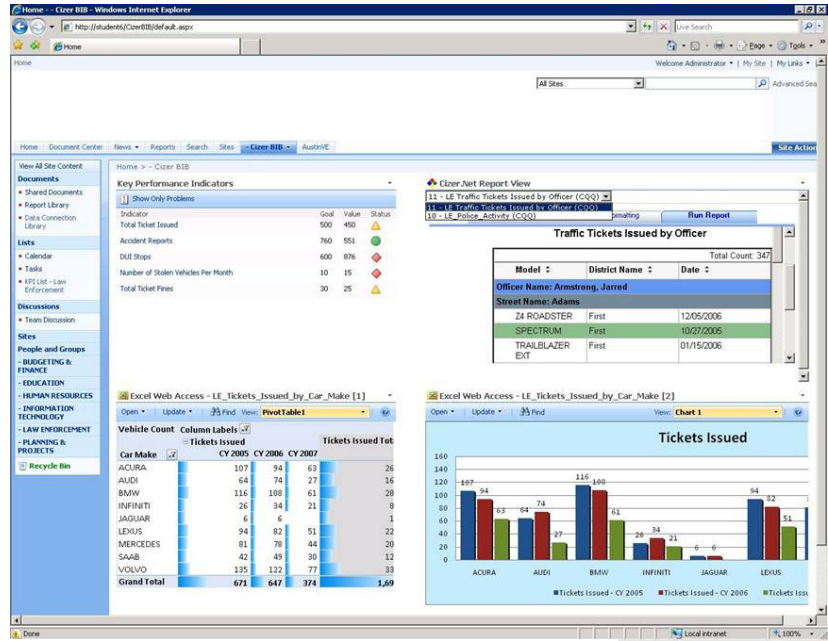

Providing Immediate Answers - Robust Dashboard and Scorecard solutions using Business Scorecard Manager and PerformancePoint Server providing insight into the Key Performance Indicators of the organization.

Who We Are

Cizer Solutions is a team dedicated to one thing - Delivering innovative Business Intelligence Solutions on the Microsoft Platform.

The Cizer Solutions team is comprised of industry experts and a complimentary team of seasoned practitioners of Business Intelligence on the Microsoft platform. The team is focused on making customers better able to understand the methodology, the technology and the value of the Microsoft and Cizer.Net Business Intelligence technologies through project-based and mentoring consulting services.

The synergy Cizer has with the B.I. industry has allowed Cizer staff to be key authors of books about Microsoft Business Intelligence, global speakers and thought leaders at conferences around the world and a few of the hand selected members of exclusive Business Intelligence and Microsoft Office Advisory Councils giving Microsoft advice and guidance on the direction of their Business Intelligence technologies.
